

BPS ASM 2022 ePOSTER LIST

ePoster Number	Topic	Title	Presenter
OP001	Assessment & Measurement	Capturing the Chronic Pain Patient Experience Using a Novel Digital Health Ecosystem	Simon Thomson
OP002	Psychology	An investigation of behavioural experiments on pain management programmes	Emma Louise Harrold
OP003	Psychology	Association of Opioid Overdose with Substance Use or Mental Health Disorders in Patients Prescribed Opioid for Chronic Pain: A Systematic Review	Li Wang
OP004	Older People	Mindfulness for adults with chronic low back pain	Michelle Barrow
OP005	Other (Research)	Chronic back pain sub-grouped via psychosocial, brain and physical factors using machine learning: a UKBioBank study of 19,803 adults	Scott Tagliaferri
OP006	Interventional Pain Management	Multifidus Stimulation in Patients with Refractory Chronic Low Back Pain and Functional Spine Insta-bility – Three-Year Pivotal Trial Results	Vivek Mehta
PP003	Acute Pain	Understanding and minimising Injection-Site Pain following subcutaneous administration of Biologics; Narrative review	Anja St. Clair Jones
PP005	Acute Pain	Glutamate as a Salivary Biomarker for Acute Pain: A Study in Healthy Volunteers After Undergoing the Cold Pressor Task	Roxaneh Zarnegar
PP006	Acute Pain	Efficacy of pridinol for musculoskeletal pain - part 1: meta-analysis of controlled and non-interventional clinical trials	Michael Andreas Überall
PP007	Acute Pain	Efficacy of Pridinol for muscular pain - part 2: real-world evidence analysis of routine data from the German Pain e-Registry	Michael Andreas Überall
PP008	Assessment & Measurement	Retrospective review of efficacy of lidocaine infusion in chronic pain patients	Harriet Daykin
PP010	Assessment & Measurement	Patient States: Artificial Intelligence-Driven Metric Providing Comprehensive Yet Straightforward Understanding of Chronic Pain Patients	Magdalena Anitescu
PP011	Assessment & Measurement	Exploring the user perceived feasibility of PainChek® and Abbey Pain Scales in the UK care home setting	Ivana Babicova
PP012	Assessment & Measurement	Making pain assessment intelligent: PainChek's journey from Australia to UK clinical practice	Kreshnik Hoti
PP013	Assessment & Measurement	A retrospective analysis of patient socioeconomic and demographic factors influencing engagement in a novel, digital pain monitoring system	Thomas Craig
PP014	Audit and Service Evaluation	Pain and Long-COVID. A collaborative project between the long-COVID hub and the Chronic Pain department in Sheffield Teaching Hospitals	Carla George Hakim
PP015	Audit and Service Evaluation	Improving Opioid Stewardship- the role of the surgeon	Kesav Aditya Vijayagopal
PP016	Audit and Service Evaluation	MRI Scans - an aid to supporting self-management for persistent low back pain? An audit of MRI practice and outcomes in a pain management service	Ben Lightowler
PP017	Audit and Service Evaluation	One Size Does Not Fit All: Enabling Choice and Patient Centred Care in a Chronic Pain Rehabilitation Service	Leila Heelas
PP018	Audit and Service Evaluation	How has the COVID-19 pandemic affected patients' experience of pain management therapy?	Olivia French
PP019	Audit and Service Evaluation	Assessing the efficacy of topical gabapentin in patients with chronic pelvic pain in secondary care	Alice Murphy
PP020	Audit and Service Evaluation	Client experiences of an online Pain Management Programme – a Thematic Analysis	Claire Wicks
PP022	Cancer Pain	Narrative review of design and outcomes measures of studies on cannabis-based medicines for chronic pain to inform better future trials	Sam Hjelmeland Ahmedzai
PP023	Cancer Pain	Cancer-related neuropathic pain (CRNP): Do patients in the UK experience gaps in diagnosis and treatment?	Dany Bell
PP024	Education	Creating a career framework to support nurses developing careers in pain management	Martin Galligan
PP026	Epidemiology	Trends in gabapentinoid prescribing: an observational study in UK primary care using the Clinical Practice Research Datalink (CPRD)	Julie Ashworth
PP027	Epidemiology	Epidemiology and Pharmacological Management of Long COVID: Insights from a Pain Service Led Post COVID assessment clinic	Deepak Ravindran
PP028	Epidemiology	Dose-Response Relationship Between Opioid Prescription for Chronic Pain and Fatal or Non-fatal Overdose: A Systematic Review and Meta-analysis	Li Wang
PP029	Epidemiology	Predicting chronic pain and disability following musculoskeletal trauma: results from a prospective observational study in the United Kingdom	David William Evans
PP030	Epidemiology	Investigating multi-joint pain and physical activity in runners and Nordic walkers	Joanne Stocks
PP032	Experimental (Basic) Science	Microencapsulation of local painkillers reveals therapeutic potential for the treatment of chronic inflammatory pain	Olga Kopach
PP034	Interventional Pain Management	HADS brief score can prevent unnecessary spinal procedures	Andreas Veihelmann
PP035	Interventional Pain Management	Utilization of Combination Therapy-Based Programming in Patients Using SCS for Chronic Pain: Outcomes from a Real-World, Observational European Study	Simon Thomson

BPS ASM 2022 ePOSTER LIST

PP036	Interventional Pain Management	Real-World Outcomes in a Chronic Pain Patient Cohort Undergoing a Single-Stage SCS-Implantation Procedure	Simon Thomson
PP040	Interventional Pain Management	Two-Year Outcomes of an SCS System Capable of Multiple Neurostimulation Modalities: A Randomized Controlled Trial	Mark Wallace
PP041	Interventional Pain Management	Real-World Outcomes Using a Novel SCS Device Capable of Engaging Multiple Sub-Perception Mechanisms	Clark Metzger
PP042	Interventional Pain Management	Enhanced Energy Efficiency and Spinal Cord Stimulation Outcomes using Fast-Acting Sub-Perception Therapy (FAST) for Chronic Pain	James North
PP043	Interventional Pain Management	Clinical Outcomes Using a New Fast-Acting Sub-Perception Therapy for Chronic Pain: A Multicenter, European, Observational Real-World Study	Simon Bayerl
PP044	Interventional Pain Management	Intracortical connectivity changes following infra-slow neurofeedback training in painful chronic knee osteoarthritis: a feasibility clinical trial	Jerin Mathew
PP045	Interventional Pain Management	DMARDS and SSI - relevance in interventional procedures	Tacson Fernandez
PP046	Neuropathic Pain	Long-term neuropathic pain behaviors correlate with synaptic plasticity and limbic circuit alteration: a comparative observational study in mice	Francesca Guida
PP047	Neuropathic Pain	Neuropathic pain among patients with epidermolysis bullosa simplex: a retrospective study of patient and pain characteristics and treatment	Syed Fazal Hussein Shah
PP048	Neuropathic Pain	An autonomous peripheral clock in sensory neurons drives diurnal pain behaviours	Liting Wei
PP049	Neuropathic Pain	High cervical stimulation for occipital neuralgia and cervicogenic headaches	Simon Thomson
PP050	Neuropathic Pain	Real World Outcomes in Pandemic: A Tertiary Care UK Neuromodulation Center Snapshot Activity	Alia Ahmad
PP051	Non-Pharmacological Pain Management	Outcomes from people suffering from chronic pain who have had access to supported self-management during the COVID-19 pandemic	Sonia Cottom
PP052	Non-Pharmacological Pain Management	Experiences, barriers and needs of physiotherapists with regard to providing self-management support to people with low back pain: A qualitative study	Nathan Hutting
PP053	Non-Pharmacological Pain Management	A new method for a self-care treatment of a patients suffering from chronic pains by computer assisted biofeedback	Dirk Peek
PP054	Non-Pharmacological Pain Management	Physiotherapist-led biopsychosocial education and exercise programme for patients with chronic low back pain in Ghana: mixed-methods feasibility study	Paapa Kwesi Ampiah
PP055	Non-Pharmacological Pain Management	To evaluate patient reported outcomes for patients attending online multi-disciplinary pain management programmes, delivered via video conferencing	Leila Heelas
PP057	Non-Pharmacological Pain Management	How effective are educational, behavioural, and cognitive interventions for adults with chronic migraine?	Natasha Clare Davies
PP058	Non-Pharmacological Pain Management	Electrotherapy and Exercise-Based Program Could Improve Muscle Weakness, Adherence to Exercises and Reduce Intra-Articular Corticosteroids in Knee OA	Dimitar Georgiev Tonev
PP059	Non-Pharmacological Pain Management	The Impact of biopsychosocial factors on the association between physical activity and pain in fibromyalgia– Cross-sectional survey	Kabir Isah Mayana
PP061	Older People	Primary care physician's attitude towards the prescription of analgesics in elderly patients with chronic non-cancer pain	Mok Hui Teng Jessica
PP062	Other (Research)	Long-Term Effectiveness and Safety of Medical Cannabis Administered via The Metered-Dose Syqe® Inhaler	Joshua Aviram
PP064	Other (Research)	Role of community pharmacists in optimizing opioid therapy for chronic non-malignant pain management- a logic model	Ayesha Iqbal
PP066	Other (Research)	Development of MRI-compatible Device to deliver and measure pressure pain thresholds in experimental and clinical pain research	Sharmila Khot
PP067	Paediatric	Patellofemoral pain, body morphology and alignment in pubertal dancers: Two-years follow-up	Nili Steinberg
PP068	Paediatric	"That's why we have a consultation...": Exploring children and young peoples' experiences of and perspectives about pain communication in paediatric rhe	Rebecca Rachael Lee
PP069	Paediatric	"They need to get used to it...": Identifying patterns in communication about children and young people with pain by healthcare professionals	Rebecca Rachael Lee
PP070	Paediatric	Outcomes young people consider important to measure during their chronic pain treatment	Rhiannon Joslin
PP071	Paediatric	Self-compassion in Adolescents with Chronic Pain	Jennifer Norah Ford
PP072	Primary Care	Stakeholder involvement in the development of a new proactive clinical review of patients prescribed opioid medicines long-term for persistent pain	Julie Ashworth
PP074	Psychology	A qualitative study with orthopaedic practitioners on psychosocial factors and surgical outcomes	Lorelle Dismore
PP075	Psychology	Patients' experiences of their postoperative outcomes following forefoot surgery	Lorelle Dismore
PP076	Psychology	To choose pain: Natural birth as a vital case of benign masochism	Orli Dahan
PP077	Psychology	Are Pain Management Programmes Effective When Delivered Remotely?	Isaac Marsden Loftus

BPS ASM 2022 ePOSTER LIST

PP078	Psychology	Reframing Pain as a Positive Signal: A Randomized Controlled Trial and Novel Intervention Approach	Lauren C Heathcote
PP080	Psychology	Pain is commonly experienced and associated to low mood and anxiety in people with Long Covid	Faith Martin
PP081	Psychology	Placebo Analgesia: Single- And Double-blinded Administration of Information About Effects of Dental Treatment	Hojjat Daniali
PP082	Psychology	The role of pain catastrophising in osteoarthritic knee pain following genicular arterial embolisation	Richard Harrison
PP083	Reviews	Effects of different physical therapy techniques on the improvement of sleep quality in patients with chronic pain	Silvia Di Bonaventura
PP084	Reviews	Liposomal bupivacaine decreases post-operative opioid use in ACLR's	Neeraj Vij
PP085	Reviews	Liposomal bupivacaine in high volume local infiltration analgesia in total hip arthroplasty	Neeraj Vij
PP086	Service Management	The Impact Of Virtual Clinics On Clinicians During The Covid-19 Pandemic	Adam Samways
PP087	Service Management	Online Complex Pain MDT Meeting: A Service Evaluation	Davina Amin
PP088	Acute Pain	Multimodal analgesia and maxillofacial surgery	Gloria Molins
PP089	Cancer Pain	Cancer pain knowledge & attitudes of healthcare professionals: A systematic review of the scales and measurement properties used to explore knowledge	Martin Galligan
PP091	Experimental (Basic) Science	Circadian regulation of trigeminal pain circuits	Florian Zirpel
PP094	Interventional Pain Management	Real world experience of use of the NEVRO system in patients with refractory neuropathic pain at Sheffield Teaching Hospitals	Carla Hakim
PP095	Neuropathic Pain	Conditioned pain modulation (CPM) as a biomarker of fibromyalgia diagnosis and severity: effect of CPM paradigm	Antonio Gil Ugidos
PP096	Non-Pharmacological Pain Management	Whole-body Photobiomodulation treatment of fibromyalgia: a triple-blinded randomized clinical trial	Santiago Navarro-Ledesma
PP097	Other (Research)	Causes of pain and functional disability of the hand in patients with systemic sclerosis	Agachi Svetlana
PP098	Other (Research)	Inhalation of pharmaceutical grade, THC-dominant, cannabis flos improves pain scores and health-related quality of life in eligible UK patients	Guillermo Moreno Sanz
PP100	Psychology	Parent-Child Reminiscing About Past Chronic Pain Experiences	Maria Pavlova
PP101	Psychology	Glass half full? A diary and interview qualitative investigation of flourishing among adolescents living with chronic pain	Ryan D Parsons
PP103	Paediatric	Association of parental and adolescent emotion-related factors with adolescent chronic pain behaviors	Helen Koechlin
